Plants should be kept as near the  
light as possible, and those that are  
at the sides or back of a room should  
be constantly turned and interchanged.  
Palms and some other plants derive  
much benefit from being reported. It  
is advisable to let a florist do this, as  
he understands and has ready the different  
kinds of soil suitable for his  
various patients.Full Realization.
